Important Password Rules!!!

- Your passwords must have uppercase, lowercase, numbers, and special characters for maximum security!

- Do not reuse passwords across applications/websites and/or devices!

- Your passwords should be at the very least 8 characters long!

- You should change your password at least every 2 weeks!

- Always use MFA (multi-factor authentication) if it is available or offered!

- Password managers are software that makes it very easy to secure your passwords across accounts and devices. It is always a good idea to implement these into your devices and accounts!
